Profile

6+ years building high-throughput distributed systems across fintech, healthcare and data platforms on **AWS & GCP**. Founding **Mirage Reality Labs** - live AI SaaS (Rachna AI Studio) integrating Claude, Gemini, DeepSeek & ChatGPT. Shipped games to Google Play, published Unity assets. Owns complex problems end to end.

Experience

7 yrs · Bengaluru / Hyderabad

Founder & Full Stack Engineer

Apr 2025 - Present

Mirage Reality Labs · Bengaluru

Claude API · Gemini API · DeepSeek · ChatGPT/Codex · Spring Boot · Java · JavaScript · GCP (Cloud Run, Cloud Storage, Cloud SQL) · AWS · Vercel · Unity 3D · ElectronJS

- Founded and built **Rachna AI Studio** - live AI SaaS with Wedding card generator, Website Builder, Greeting card generator, Resume Builder and QR utilities; solo zero-to-production integrating **4 AI APIs**.
- Engineered full stack architecture with **Spring Boot (Java)** backend and **JavaScript** frontend; implemented SEO best practices achieving **top organic rankings** for "Mirage Reality Labs" and "Rachna AI Studio".
- Integrated Claude, Gemini, DeepSeek and ChatGPT for generative design and copy workflows; no code visual editor enabling non-technical users to build full websites.
- Developed and released **two games** (Play Store + Itch.io); published paid 3D assets on Unity Asset Store; hands-on across Unity dev, pipelines, asset creation and post-launch updates.
- Deployed all services on **GCP** - Cloud Run for containerised workloads, Cloud Storage for assets, Cloud SQL for persistence.

Software Consultant

Oct 2023 – Apr 2025

Liftoff LLC · Bengaluru

Golang · Java · AWS (S3, EC2, Lambda, Kinesis, Aurora) · Kafka · PostgreSQL

- Built a fully automated overnight loan-processing engine in Go - processing flagged pending loans without manual intervention, stabilising **thousands of daily loan records**.
- Developed a mass document-generation pipeline producing **5 - 10k PDFs/day** with parallel Go workers.
- Designed a config-driven orchestration layer enabling dynamic API + workflow mapping per client - **zero code changes per onboarding**.
- Delivered scalable backend components for digital mortgage pricing (Java + Go).

Senior Software Engineer · SDE-2

Sep 2022 – Aug 2023

Halodoc · Bengaluru

Owned backend design and development in the Medical Insurance vertical (Golang + Java).

Golang · Java · Microservices · PostgreSQL · AWS

- Designed a modular reimbursement claims engine with dynamic rule evaluation - slashed latency from **minutes → seconds**.
- Built a high-volume data ingestion service for partner onboarding handling **millions of records** (CSV + API).
- Led concurrency, caching and DB tuning across insurance microservices to eliminate accumulated technical debt.

Software Engineer

Mar – Sep 2022

Slicelt Credit · Bengaluru

Scalable backend systems and microservice architecture (Golang, Java, NodeJS).

Golang · Java · NodeJS · Kafka

- Introduced Kafka into a synchronous order processing system → async event-driven architecture; **2-3x throughput increase** and dramatically reduced peak-time latency.
- Built the Early Repayment / Invoice Generation workflow end to end: computing charges, generating early invoices and enabling customers to pay proactively.

Software Engineering Specialist

May 2019 – Feb 2022

General Electric Digital · Hyderabad

Data-centric backend tools focused on automation, security and scalability.

Golang · Java · AWS · Kafka · Cassandra · PostgreSQL

- Built an autonomous PII/data cleanup system - cron-driven, processing **~100 GB/month** (peak 752 GB); saved compliance teams hundreds of hours annually.
- Developed Kafka ingestion + query layers: Golang ingestor for hot/cold storage (Postgres & Cassandra) and a Java query app for fast analytical lookups at scale.
- Created an **AWS Secrets Management library** used across multiple microservices, standardising secure credential access.

EARLIER EXPERIENCE & INTERNSHIPS

GE Digital

Software Intern

Data Pipeline Automation

Built a cross platform app automating data pipelines across multiple databases with exportable formats; laid groundwork for product catalog import/export logic adopted in production.

Java · Cross-platform · Multi-DB

May – Jul 2018

Alive Home Tech.

IoT Intern

IoT Home Automation System

Designed and built an IoT-powered automation system with real time mobile app control; implemented embedded logic for smart storefront extensions deployed at client sites.

IoT · Embedded · Mobile App
